Summary

Python Backend Developer with experience building data-driven applications, automation tools, and SQL-based systems. Skilled in FastAPI, REST APIs, and database management using PostgreSQL and SQLAlchemy. Familiar with OOP, Git, and developing scalable, maintainable solutions through hands-on technical projects and professional experience in data-driven operations.

Technical Skills

Languages: Python, Java

Backend & APIs: FastAPI, REST APIs, Python Backend Development

Libraries & Automation: SQLAlchemy, Pandas, NumPy, Selenium, Matplotlib

Database: PostgreSQL, SQL, SQLite

Tools: Git, Power BI, Jupyter Notebook, VS Code

Concepts: Data Structures & Algorithms, OOP, CRUD Operations

Projects

Retrievy – Lost & Found Management Platform

- Developed a high-performance backend for a Lost & Found platform using Fast API to facilitate efficient reporting and recovery workflows.
- Architected a robust relational database schema with PostgreSQL, utilizing SQL Alchemy ORM for seamless data persistence and complex querying.
- Implemented secure user authentication and advanced search/filter functionality to optimize item-matching workflows.
- Built a scalable and modular system following Object-Oriented Programming (OOP) principles to ensure maintainability.

Aureus (Expense Tracker)

- Built a backend-driven application to manage and track daily expenses using Python and SQLite.
- Designed database schema and implemented CRUD operations for efficient data handling.
- Enabled structured storage and retrieval of financial data for enhanced analysis and reporting.

Professional Experience

Management Trainee (US Support) – LanceSoft

May 2025 – Sep 2025

- Analysed workforce and staffing data to support decision-making, identifying trends in recruitment metrics.
- Created reports and dashboards while collaborating with cross-functional teams to improve staffing efficiency.

Associate (Customer Support) – Tech Mahindra

Apr 2024 – Apr 2025

- Analysed large volumes of support tickets to identify recurring technical issues and performed root cause analysis.
- Prepared reports and maintained technical documentation (SOPs/FAQs) to improve processes and enhance user experience.

Education

Banki Autonomous College, Cuttack | Bachelor Degree in Computer Science | Aug 2020 – Jul 2023
