Summary

Python Backend Developer skilled in FastAPI, PostgreSQL, and REST API development with hands-on experience building scalable backend systems, authentication workflows, and database-driven applications.

Technical Skills

Languages: Python, Java

Backend & APIs: FastAPI, REST APIs, API Development

Libraries & Automation: SQLAlchemy, Pandas, NumPy, Selenium, Matplotlib

Database: PostgreSQL, SQL, SQLite

Tools: Git, Power BI, Jupyter Notebook, VS Code

Concepts: Data Structures & Algorithms, OOP, Backend Architecture

Projects

Retrievy — Lost & Found Platform

[GitHub](#) | [Live Demo](#)

Tech Stack: FastAPI, PostgreSQL, SQLAlchemy, JWT, React, Tailwind CSS

- Built a full-stack Lost & Found platform using FastAPI and PostgreSQL with modular backend architecture and RESTful APIs.
- Implemented secure JWT authentication and password hashing using Passlib/Bcrypt for protected user access.
- Designed scalable database models with SQLAlchemy ORM and automated DB session management using dependency injection.
- Developed dynamic search/filtering and item-matching logic to connect lost and found reports efficiently.
- Utilized Pydantic response models and OOP principles to ensure clean API structure, data validation, and maintainable code.

Aureus (Expense Tracker)

- Built a backend-driven application to manage and track daily expenses using Python and SQLite.
- Designed database schema and implemented CRUD operations for efficient data handling.
- Enabled structured storage and retrieval of financial data for enhanced analysis and reporting.

Professional Experience

Management Trainee (US Support) – LanceSoft

May 2025 – Sep 2025

- Analysed workforce and staffing data to support decision-making, identifying trends in recruitment metrics.
- Created reports and dashboards while collaborating with cross-functional teams to improve staffing efficiency.

Associate (Customer Support) – Tech Mahindra

Apr 2024 – Apr 2025

- Analysed large volumes of support tickets to identify recurring technical issues and performed root cause analysis.
- Prepared reports and maintained technical documentation (SOPs/FAQs) to improve processes and enhance user experience.

Education

Banki Autonomous College, Cuttack | Bachelor Degree in Computer Science | Aug 2020 – Jul 2023
