Summary:

Python Backend Developer with hands-on experience in building data-driven applications using Python and SQL. Skilled in developing backend logic, working with REST APIs, and handling structured data efficiently. Experienced in automation, data processing, and creating visual insights using Power BI and Matplotlib.

Technical Skills:

Languages: Python, Java

Backend & APIs: REST APIs, Python Backend Development

Libraries: Pandas, NumPy, Matplotlib

Database: SQL

Tools: Git, Power BI, Jupyter Notebook, VS Code

Concepts: Data Structures & Algorithms, OOP

Projects

Expense Tracker (Python + SQLite)

- Built a backend-driven application to manage and track daily expenses using Python and SQLite
- Designed database schema and implemented CRUD operations for efficient data handling
- Enabled structured storage and retrieval of financial data for better analysis

Food Delivery Website (Academic Project)

- Developed a full-stack web application using HTML, CSS, JavaScript, and SQL
- Implemented user authentication, admin panel, and order management system
- Integrated database for handling user data, orders, and menu management

Experience

Management Trainee (US Support) – Lance soft

May 2025 – Sep 2025

- Collected and analysed workforce and staffing data to support decision-making, identifying trends in recruitment metrics and candidate pipelines.
- Created reports and dashboards while collaborating with cross-functional teams to improve staffing efficiency and workforce planning.

Associate (Customer Support) - Tech Mahindra

Apr 2024 – Apr 2025

- Analysed large volumes of support tickets to identify recurring technical issues, performing root cause analysis to improve resolution efficiency.
- Prepared reports, maintained documentation (SOPs/FAQs), and used data insights to improve processes and enhance user experience.

Education:

Banki Autonomous College, Cuttack| Bachelor Degree in Computer Science | Aug 2020 – Jul 2023
